EDUCATION

MBM University, Jodhpur

Bachelor of Engineering (B.E.) in Computer Science Engineering

Jodhpur, Rajasthan

Expected 2027

EXPERIENCE

ESRC Embedded Systems & Robotics Workshop

MBM University

June 2024 – July 2024

Jodhpur

- Built Arduino-based systems including a harmonium player and 7-segment display module
- Developed a line follower robot using IR sensors and real-time motor control logic
- Designed a Bluetooth-controlled robotic car enabling wireless navigation
- Implemented decision-based automation for a Tic-Tac-Toe playing robot

Frontend Developer Intern

Soseotech Advisory LLP

Aug 2025 – Oct 2025

Remote

- Developed a responsive React-based frontend using component-driven architecture
- Built 10+ reusable UI components improving scalability and maintainability
- Designed and implemented the **Finance Saarthi** platform with structured navigation
- Improved user engagement by optimizing navigation flow and UI consistency
- Collaborated with cross-functional teams to convert wireframes into responsive interfaces
- Applied clean coding practices and modern UI/UX principles across applications
- Integrated semantic HTML, accessibility standards, and SEO-friendly structure

PROJECTS

AI Chatbot using LLM APIs | React, Node.js, OpenAI API | GitHub

Feb 2026

- Developed an AI-powered chatbot with real-time conversational capabilities using LLM APIs
- Built a full-stack architecture integrating React frontend with Node.js backend
- Implemented context-aware responses and prompt engineering techniques
- Designed scalable API handling for efficient response generation
- Explored Generative AI concepts including token usage and response optimization

Jewelry E-Commerce Platform | React, Node.js, Express, JWT | GitHub

July 2025

- Developed a full-stack e-commerce platform with product listings and filtering features
- Implemented authentication and authorization using JWT-based secure APIs
- Designed reusable UI components following modern UI/UX practices
- Structured backend for scalability and future integration of recommendation systems

Gamified Learning Platform (SIH Prototype) | Three.js, React | Live Demo

Sept 2025

- Developed a 3D interactive learning interface using Three.js
- Collaborated in a team to design application flow and UI components

TECHNICAL SKILLS

Languages: C, C++, Python, Java, JavaScript, HTML, CSS

Frontend: React, Tailwind CSS, UI/UX Design, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Machine Learning: NumPy, Pandas, scikit-learn, Matplotlib, Regression & Classification Models, Basics of NLP

Developer Tools: Git, GitHub, VS Code, Postman

Databases: MySQL
